

Managing barley at T2 to maintain green canopy and maximise yield

BONTIMA provides broad-spectrum disease control...

...and outstanding green leaf protection

In Brief

- A wide range of diseases can threaten later in the season - e.g. *Rhynchosporium*, net blotch, mildew, rust and *Ramularia*
- The T2 fungicide will help to maintain 'top to bottom' green canopy protection
- Prolonging green canopy will maximise yield and quality
- BONTIMA delivers a full spectrum of disease control and green canopy protection at T2 in barley
- AMISTAR OPTI remains a proven alternative fungicide base at T2 on spring barley

Core Recommendation

- Next generation SDHI barley fungicide – non-triazole, non-strobilurin
- Simple solution against major barley disease threats – *Rhynchosporium*, net blotch, brown rust, mildew, *Ramularia*
- Trials have shown that BONTIMA at T2 also delivers excellent reduction in brackling
- Does not require a triazole tank mix
- Powerful IZM technology for long-lasting green leaf to maximise yield and quality
- Proven on farm and in trials under Irish conditions

Bontima® 1.6–2.0 l/ha

Use the higher rate on winter barley or where disease pressure is high

Bravo® 1.0 l/ha

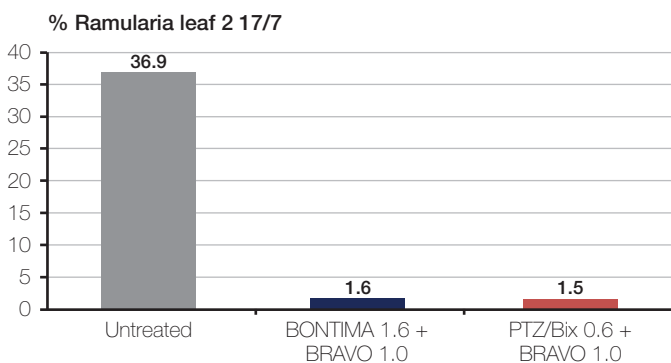

BONTIMA – outstanding against *Rhynchosporium*
