

CERATAVO PLUS TANK MIX LIST

The following tank mixes have been tested for physical compatibility with CERATAVO PLUS at recommended rates of use and will mix in the sprayer tank. No tests have been undertaken on crop safety or product performance therefore, use is at the user's own risk. Syngenta IRL Ltd will support the physical compatibility of 2 or 3-way tank mixes of CERATAVO PLUS with any of the fungicides, herbicides, insecticides or PGRs listed. In addition, products **highlighted** have been tested for biological and physical compatibility. For further information on compatibilities, contact Syngenta IRL Ltd.

FUNGICIDES

Headland Copper ¹	Headland Multiple Pro	YaraVita Mancuflo
Headland Liquid Manganese 15%	Headland Zinc	

NOTES

Before using any tank mixture, consult and comply with the recommendations of the partner products. Each product should be added separately to the bulk of the water in the spray tank and thoroughly mixed before adding the next chemical. Always use constant agitation of the sprayer tank during mixing, transportation and application. Spray immediately.

¹Continuous agitation at all times.

²Supported by Adama

12 October 2021

Buffer zone: 6 metres
Rainfastness: After 1 hour

**Use plant protection products safely.
